### Core Competencies / Skills

- QA & Test Automation: Cypress (UI & API Automation), API Testing (Postman, Swagger), Regression Testing, Functional Testing, User Acceptance Testing (UAT), Test Case Design & Execution, Defect Management & Reporting.
- Backend & Performance Testing: Basic SQL Data Validation, Database Testing, Apache JMeter.
- Security & Compliance: Vulnerability Assessment, OWASP ZAP Certified Data Protection Officer (DPO).

### Tools & Platforms

- Jira
- Git/GitHub
- Wiki.js
- Google Workspace
- Service Desk Platforms

### Process & Leadership

- Agile Methodologies
- QA Process Improvement
- Team Leadership
- Stakeholder Management
- Knowledge Management
- Root Cause Analysis

### Education Background

- **ISFOP Benin University, Cotonou**  
B.ENG Computer Engineering. 2:1

### Professional Summary

QA Automation Lead and Computer Engineer with 4+ years of experience in test automation, API testing, SQL validation, and performance testing.

Experienced in building Cypress automation frameworks, leading QA initiatives, and improving software quality through structured testing processes. Certified Data Protection Officer (DPO) with a strong focus on reliability, security, and continuous improvement.

### Work History

#### Team Lead, Quality Assurance

*Oasis Management Company*

*June 2024 - June 2026*

- Developed and implemented QA strategies that improved testing efficiency and supported the delivery of high-quality software releases.
- Performed SQL-based backend validation in staging databases to verify data integrity, identifying critical payment gateway synchronization issues where successful UI transactions remained in pending database states.
- Built and maintained Cypress API automation suites to improve regression coverage and accelerate defect detection.
- Led performance testing initiatives using Apache JMeter to evaluate application stability and scalability under load.
- Integrated OWASP ZAP vulnerability scanning into QA workflows, enabling early identification of security risks before production releases.
- Designed and implemented the company's Knowledge Management System using Wiki.js, centralizing onboarding materials, QA processes, and operational documentation.
- Developed automated Google Workspace reporting solutions, including real-time defect tracking, support SLA dashboards, QA frameworks, and compliance checklists that improved team visibility and performance monitoring.

#### Head, Service Management

*Byteworks Technology Solutions Limited*

*October 2022 – May 2024*

- Supervised front-end operational duties.
- Optimised operational duties and workflows utilising CRM tools, including Service Desk and Jira.
- Handled complex IT issues to minimise customer downtime and developed creative solutions and workarounds.
- Provided overall leadership and guidance on talent acquisition, career development and retention for Top Customer Service Agents and Front-End Staff through training and mentorship.
- 15% increase in job satisfaction through employee coaching, and feedback.

## QA Automation Lead | Computer Engineer

### Interests

---

- Information Technology.
- Software & Hardware Engineering.

### Certifications

---

2026

- Google Cybersecurity Professional Specialisation
- Apache JMeter™ Pro & Intro (BlazeMeter University)

2025

- Certified Data Protection Officer (Data Protection Academy)

2024 – 2025

- Google IT Automation with Python
- Cypress API & UI Automation

2023

- ITIL 4 Exam Preparation.

2022

- Google IT Support Professional Certificate.
- Healthcare IT Support.

2020

- Computer Repairs (SAED).
- Health Safety & Environmental Management (HSE).
- Computer Repairs, Services, & Maintenance (GSKILLS).
- National Youth Service Certificate (NYSC).

2015

- Certified Secure Computer User (CSCU)

### Professional Experience

---

#### IT Infrastructure Maintenance/ITSM Asset Manager

*Byteworks Technology Solutions Limited*

*May 2022- October 2022*

- Directed infrastructure support strategy and operations, resulting in efficient and reliable infrastructure.
- Managed an IT infrastructure budget of ₦3 million, achieving 20% cost savings.
- Performed and delegated regular backup operations and implemented appropriate processes for data protection, disaster recovery, and failover procedures.
- Provided documentation and technical specifications to IT staff for planning and execution of new or upgraded IT infrastructure.
- Server installations setup with RPM(Offline) and without RPM (Online).

#### Technical Support Engineer (Team Lead)

*Byteworks Technology Solutions Limited*

*February 2021- March 2022*

- Diagnosed and resolved customers' complex software and hardware issues, effectively minimised downtime and ensured optimal performance across Nigeria.
- Collaborated with other teams to identify and address recurring product issues, resulting in an 80% reduction in reported defects.
- Coached 5 junior support engineers every quarter, fostered their technical skills, and enhanced team performance and retention.

#### Internship

*NITDA*

*May 2015- August 2015*

- Assisted with the software installations.
- Hands-on experience in computer maintenance activities.
- Created resource support materials for customers that empowered and enabled the user community to extend skills, leverage system features and find resolutions to questions without the continuous engagement of the support IT team.

#### Volunteer- Bass Instructor

*NYSC*

*August 2019 - August 2020*

- Delivered lectures on rhythmic patterns and beats to bass drum musicians in preparation for NYSC events.
- Conducted rehearsals for the Marshal Band Performances together with other musicians.
